

The Trust & Execution Layer for Africa's Energy, EPC & Engineering Sector.

Connecting certified specialists, consultants, and contractors to institutional energy RFPs with guaranteed milestone escrow and AI bidding intelligence.

Verified Talent Registry

Statutory compliance vetting (COREN, CAC, NIPEX, NIN) for zero-risk contractor placement.

Milestone Escrow Payouts

Funds locked before work begins, released instantly upon deliverable approval via NOVA Bank DVA.

Kolly AI Bidding Copilot

AI-assisted tender scoping, milestone generation, and instant technical proposal drafting.

The African EPC Procurement Paradox

B2B infrastructure projects across Africa suffer from broken trust, 90+ day payment delays, and opaque contractor verification.

Credential Fraud & Delays

Enterprises spend months manually verifying engineering certifications. Unverified contractor failures cost billions annually.

Severe Cash Flow Gridlock

Specialists wait 3 to 6 months for milestone payments; clients fear paying 100% upfront mobilization fees with zero guarantees.

Global Platforms Fail Africa

Upwork and Fiverr lack Nigerian NUBAN payouts, NOVA Bank/Paystack settlement, local tax compliance (WHT/VAT), and statutory EPC context.

An End-to-End Operating System for African Contracting

From tender discovery and proposal submission to milestone execution and instant bank payout.

01

Vetting & KYC

Multi-tier verification engine for COREN, CAC, and regulatory compliance.

02

Tenders & RFPs

Institutional pipelines across Oil & Gas, Power, Solar, and Civil EPC.

03

Smart Escrow

Funds locked securely before mobilization; instant NUBAN release on approval.

04

Kolly AI Copilot

Instant technical proposal drafting and rate estimation for high-velocity bidding.

\$120 Billion Underserved Market

Sub-Saharan Africa's energy transition, infrastructure boom, and local content regulations are driving explosive digital procurement growth.

\$120B

TAM (Total Addressable Market)

Annual energy, infrastructure, power, and mining procurement spend in Sub-Saharan Africa.

\$18.5B

SAM (Serviceable Market)

Nigerian Oil & Gas (NIPEX), Commercial Solar, and Industrial EPC tenders.

\$450M

SOM (Obtainable Market)

Digital freelance, technical consultancy, and contractor marketplace volume by Year 3.

The Complete 3-Portal Ecosystem

Built with enterprise glassmorphism, instant virtual banking, and real-time collaboration tools.

Professionals Portal

Bidding dashboard, AI proposal generator, milestone deliverable submissions, and instant NUBAN wallet withdrawals.

Company Portal

Tender & RFP posting manager, applicant comparison matrix, escrow milestone funding, and team workspace.

Admin Command Center

KYC & CAC statutory verification queue, Paystack/NOVA Bank settlement manager, and dispute mediation hub.

High-Margin, Diversified Revenue Streams

Collekt captures value at transaction execution, recurring enterprise SaaS, and compliance verification.

5-8%

Escrow Take-Rate

Platform commission charged on completed milestone payouts.

\$199/m

Enterprise Subscriptions

Monthly SaaS fees for unlimited RFP postings and priority vetting.

\$135,000

Verification Badge

One-time background audit and COREN credential certification fee.

2.5%

Dispute & SLA Retainers

Legal contract generation & institutional mediation retainers.

Why Collekt Wins in Africa

Global platforms cannot replicate our deep local regulatory and fintech infrastructure.

Local Regulatory Vetting

Native verification for COREN engineers, CAC incorporation, NIPEX JQS readiness, and Nigerian Local Content compliance.

Direct NUBAN Virtual Escrow

NOVA Bank & Paystack virtual DVA integration enables zero-FX friction, instant local payouts, and tax compliance (WHT/VAT).

Domain-Specific AI Copilot

Kolly AI is trained on African energy tenders, EPC rate cards, and technical milestone structures.

Validated by Industry Partnerships

Proven technical execution and strategic corporate alliances.

Shuttlers SLA Agreement

Executed institutional Service Level Agreement with corporate transport leader Shuttlers Metropolitan Mobility Ltd.

4.9 / 5.0 Community Rating

High satisfaction scores on platform response time, glass UI performance, and payout security.

Live NOVA Bank DVA Integration

Automated Paystack dedicated virtual accounts powering 10-digit NUBAN escrow payouts.

Rapid Growth & Scalable Unit Economics

Projected Gross Merchandise Value (GMV) and Net Platform Revenue.

YEAR 1 (2026)

\$3.2M

GMV Transacted

\$290,000 Net Revenue

2,500 Verified Specialists

350 Corporate Clients

YEAR 2 (2027)

\$14.8M

GMV Transacted

\$1.35M Net Revenue

12,000 Verified Specialists

1,800 Corporate Clients

YEAR 3 (2028)

\$48.5M

GMV Transacted

\$4.40M Net Revenue

45,000 Verified Specialists

6,500 Corporate Clients

Scale, Automation & Regional Expansion

Clear technical milestones to dominate West African technical procurement.

Phase 1: Q1–Q2 2026

- Interactive Milestone Kanban Board
- Automated Tax Invoice & VAT Generator
- Native Mobile PWA App Launch
- WhatsApp Instant Alert Engine

Phase 2: Q3–Q4 2026

- Dual-Currency Escrow (USD & NGN)
- Direct NIPEX JQS Registry API Connector
- Corporate Enterprise Team Workspaces
- AI Automated Contract Dispute Auditor

Phase 3: 2027

- Regional Expansion to Ghana, Kenya, Angola
- Institutional Tender Financing & Invoice Factoring
- Collekt Engineering Academy & Certification

Experienced Execution & Domain Expertise

Led by proven operators in African energy procurement, marketplace engineering, and fintech escrow.

D

Dave Oladapo Ojeowere

Founder & Chief Executive Officer

Experienced Proposal Manager, Product Architect, and Technical Business Leader with deep domain expertise in Nigerian energy tenders, B2B procurement workflows, and marketplace operations.

Technical & Industry Advisory

- **Senior Energy & EPC Advisors** â€” Former procurement directors at IOCs and EPC conglomerates.
- **Fintech & Escrow Regulatory Counsel** â€” Specialists in Nigerian payment systems and NUBAN compliance.
- **Full-Stack AI & Platform Engineers** â€” Building high-performance, real-time marketplace systems.

The Ask: \$500,000 Seed Round

Funding 18 months of aggressive growth, enterprise sales, and AI-powered product scaling.

40%

Engineering & AI

Kolly AI copilot enhancements, mobile PWA, and automated NIPEX/COREN connectors.

35%

Enterprise BD & Sales

Direct onboarding of 500+ energy operators, EPC firms, and solar developers.

15%

Compliance & Escrow

Regulatory licensing, Escrow reserve guarantees, and legal compliance.

10%

Operations & Community

Specialist vetting team, customer support, and QA/QC management.
